Professional summary

Versatile IT professional with hands-on experience in technical support and hardware asset management. Proficient in deploying RFID scanners, batch scripting, and troubleshooting network connectivity for devices from Dell, HP, Lenovo, Apple, Google, and Samsung. Demonstrated expertise in R2v3 compliance, data sanitation, and technical documentation. Certified in Google Cybersecurity and IT Support, with strong adaptability to emerging technologies.

Work experience

Technical Support

Thyssenkrupp | Wellford, SC

January 2026 to Present

- Deployed and managed RFID scanners, ensuring seamless integration and operational efficiency across multiple departments.
- Utilized expertise in Windows 11, earlier Windows versions, and Linux operating systems to resolve technical issues and optimize system performance.
- Troubleshoot and resolved network connectivity issues in printers and devices, minimizing downtime and improving user productivity.
- Responded to program and file system path issues, achieving timely resolutions and maintaining system reliability.
- Developed and maintained batch scripts to automate routine tasks, increasing efficiency and reducing manual errors.

Hardware Tech Lead

AER Worldwide | Duncan, SC

August 2022 to December 2025

- Tested servers, desktops, and laptops from Dell, HP, Lenovo, and Apple for functionality, wiping hard drives to achieve R2v3 recycling compliance.
- Tested and performed factory resets on mobile devices from Apple, Google, and Samsung, ensuring all units met functional and data sanitation standards.
- Performed data destruction on networking devices such as switches, adhering strictly to data sanitation protocols to protect sensitive information.
- Utilized network commands including netstat, nslookup, tracer, ipconfig, and ifconfig to troubleshoot and resolve connectivity issues efficiently.
- Managed an updated asset list of company devices, ensuring accurate tracking and deployment across the organization.
- Served as liaison to the IT department, assisting with ticket responses and facilitating cross-departmental communication.
- Ensured information integrity within database systems by conducting regular audits and implementing best practices.
- Wrote concise and accurate documentation on operational procedures for device imaging and data wipes, supporting team training and compliance.
- Collaborated with team members by assisting employees with workplace tasks, fostering a cooperative and productive environment.

Education

Computer Technology, Programming and Database (Associate)

Spartanburg Community College | Spartanburg, SC
